Descriptive Catalogue

OF THE BEST

BULBS AND TUBERS

FOR

Winter and Spring Planting

BARR & SONS,

12 and 13 King Street, Covent Garden, LONDON

Barr's Nurseries: LONG DITTON, SURREY.

BARR'S NURSERIES are situated near to SURBITON STATION (London and South-Western Railway). Visitors are invited to see the magnificent collection of Daffodils, and many other beautiful Spring flowers, during March and April; and in April and May, BARR'S beautiful Early and Late Tulips, &c.; also a fine collection of Herbaceous Plants and Alpines, and many rare and beautiful Bulbous Plants, during Summer and Autumn. *Cab fare from Surbiton Station to Pound Farm entrance of Nursery is 1s.; to main entrance, which is within a hundred yards of Pound Farm entrance, 2s. Cabs are always to be had at Surbiton Station.*

Barr's 'Pure' Grass Seeds

Produce Beautiful Smooth Lawns, Tennis Courts, Cricket and Croquet Grounds, Bowling Greens, Public Parks, Pleasure Grounds, &c.

In laying down New Lawns, sow at the rate of 80 lb. per acre; but if a thick sward is required quickly, sow 100 lb. or even more Seed per acre. To renovate Old Lawns, sow 20 lb. to 30 lb. per acre.

In sowing Grass Seeds always take advantage of rainy or damp weather, and after sowing give a slight covering of clean and finely-riddled soil; this, followed by rolling when the soil is in a sufficiently dry condition *not* to adhere to the roller, will ensure a successful vegetation. After this, by frequently cutting and constantly rolling, a fine smooth Lawn will be secured.

To ensure a fine Lawn it is important that the soil to be sown should be quite clean—that is, free from the seeds of objectionable plants—and Grass Seeds used should consist solely of the fine-leaved dwarf-growing Grasses. Our **New Mixture of Dwarf Grasses** meets this; it is thoroughly cleaned, and consists solely of fine-leaved dwarf-growing Grasses. Our other mixtures of Grasses are as carefully cleaned, and will meet all the requirements for which they are offered. If newly-sown Lawns have not been thoroughly freed from the seeds of weeds or Coarse Grasses previous to sowing, these will appear with the newly-sown seeds, or even before the slower-growing fine-leaved Lawn Grasses; in such cases weeding must be done at once, or serious injury to newly-laid-down Lawns will be the result.

Sow at any time from beginning of April to the end of September, *except when the weather is hot and the earth dry*. Lawns, Cricket and Tennis Grounds, which have been much used in summer, should in autumn always be attended to, by filling up holes, and levelling where necessary, and then a general renovating of the surface by covering it with a quarter-inch of *clean soil*; on this a liberal sowing of *clean dwarf-growing Grasses*, followed by occasional rollings, will secure a fine close sward, in all respects perfect for the following year's play. When a dressing of soil is not given the surface soil, all bare places should be loosened with the rake before sowing the Grass Seed.

The Seeds of the various Grasses of which the following mixtures are composed have all been thoroughly cleaned and afterwards carefully mixed, and as the mixtures contain **no Coarse Grasses** they cannot fail to give the most satisfactory results. Clover is not added unless requested, as it is not a desirable plant for a good Lawn; there are, however, soils where the addition of Clover is a benefit, and in such cases a very small quantity of the best White Dutch Clover Seed (3 to 4 lb. to the 100 lb. of Lawn Grass) may be incorporated with the Grasses.

The Seed is sold by weight, being the only correct method of estimating quantity needed for a given space.

Barr's 'Thames Embankment' Grass Seeds for Parks, Golf Links, Cricket Grounds and Bowling Greens.—A special mixture, which has been found very successful on the Thames Embankment, and in the formation and renovation of many public and private parks and squares around London and throughout the country. Sow 60 lb. per acre, or 6 oz. per rod (30½ square yards), *if the ground is required to be covered quickly; and for renovating bald patches or where the grass is thin or poor, especially after a summer's hard wear and under trees, sow 20 to 30 lb. per acre. Per lb., 1s. 3d.; per 10 lb., 10s. 6d.; per 20 lb., 20s.; per 56 lb. and upwards at the rate of 11d. per lb.*

Barr's 'Standard' Grass Seeds for Garden Lawns, Tennis Courts &c.—In this mixture there is a larger quantity of dwarf, fine-leaved Grasses than in Barr's 'Thames Embankment'; sow 70 lb. per acre, or 7 oz. per rod (30½ square yards), *if the ground is to be covered quickly; and for renovating bald patches or where the ground is thin or poor, especially after a summer's hard wear and under trees, sow 20 to 30 lb. per acre. Per lb., 1s. 6d.; per 10 lb., 12s. 6d.; per 20 lb., 22s. 6d.; per 56 lb. and upwards, 1s. 1d. per lb.*

Barr's New Mixture of Dwarf Grasses for producing an Extra Fine Smooth Lawn.—A special mixture of the finest leaved and dwarfest growing Grasses, producing an *extra fine velvety turf*, and saving labour in not requiring frequent mowing. Sow 80 lb. per acre, or 8 oz. per rod (30½ square yards), *if the ground is required to be covered quickly; and for renovating bald patches or where the grass is thin or poor, especially after a summer's hard wear and under trees, sow 20 to 30 lb. per acre. Per lb., 2s.; per 10 lb., 18s.; per 20 lb., 34s.; per 56 lb. and upwards, 1s. 6d. per lb.*

Dutch Clover, Finest White.—No Clover is included in above Mixtures of Grasses, as we consider a lawn should consist of Grass alone. If Clover is desired, however, it may be added to the Grass Seeds at the rate of 3 to 5 lb. per acre; but it is preferable to sow the Clover separately from the Grass Seed. Per lb., 1s. 6d.

Permanent Pasture Grasses and Clovers in Mixture. Specially Cleaned.

For Heavy, Medium, or Light Meadows or Pastures, price for quantity per acre, 30s. and 40s., according to quality.

TO GET RID OF WEEDS ON LAWNS use

Watson's Lawn Sand (The Weed Destroyer).

Watson's Lawn Sand is a light grey dry powder, possessing the remarkable property of destroying Daisies, Plantains, Dandelions, and suchlike Weeds on Lawns, Cricket Grounds, and Bowling Greens; while at the same time it acts as a fertiliser to the Grass, enriching the colour and thickening the sward. An annual application of the 'Lawn Sand' in spring destroys the seedling Weeds, and invigorates the Grass, and to some extent prevents the discolouring of the Grass during hot dry weather.

Watson's Lawn Sand is well spoken of by those who have used it, and one of the best testimonies of its appreciation is the increasing annual demand. A few years back there was a good deal of correspondence in *The Field* on this preparation, and the writers strongly recommended its use on lawns for destroying weeds and producing a close turf.

Watson's Lawn Sand is clean, easy of application, and inodorous.

For fuller Particulars see Circular, free on application.

QUANTITY REQUIRED. To destroy Daisies, 3½ oz. to 4 oz. to the square yard in dry weather; 6 to 7 oz. to the square yard in wet weather.

PRICES.—34s. per cwt., including casks; per 56 lb. keg, 18s.; 28 lb. tins, 9s. 6d. Sample Canisters, 1s., 2s. 6d., and 5s. 6d.

The best Manure for Lawns is BARR'S PHYTOBROMA. See page 17.

Summer and Autumn Flowers.

BULBS AND TUBERS FOR WINTER AND SPRING PLANTING.

	per doz.	each
Abobra <i>viridiflora</i> , an elegant half-hardy perennial, <i>scarlet-fruited</i> climber for sunny trellises, arbours, &c.; store the tubers in dry sand or soil in a cool place away from frost, and plant out when mild enough in spring.....	s. d. s. d.	5 6...0 6
Achimenes , these make charming pot plants for a cool greenhouse, and are very decorative with their brilliantly coloured elegant flowers; plant 3 roots in a 4½ inch pot, in light sandy soil, and start in a gentle bottom heat. 12 beautiful varieties, 1 root each, 3s. 6d.; 3 roots each, 12 varieties, 8s. 6d.		
Achimene <i>tubiflora</i> (<i>syn. Dolichodeira</i>), a valuable pot-plant for greenhouse, bearing trusses of long tubular white flowers of a delicious and powerful scent	4 6...0	5
Agapanthus (African Lily), valuable pot-plants for the greenhouse, and when grown in tubs on terrace walks and lawns, or planted out by streams, lakes, and ponds, few plants are so effective. During severe winters they should be covered, or in very cold climates be taken indoors until Spring, water being given only sparingly. This plant is a gross feeder, and likes a rich soil and plenty of moisture while in growth.		
<i>umbellatus</i> , handsome umbels of <i>rich blue</i> flowers	7 6...0	9
<i>flore pleno</i> , a very handsome variety, with fine double <i>blue</i> flowers	— ...2	0
<i>maximus</i> , bearing umbels of large <i>rich blue</i> flowers, very handsome	— ...1	3
<i>albus</i> , handsome umbels of <i>white</i> flowers	— ...1	6
<i>Mooreanus</i> , small <i>blue</i> flowers in graceful umbels	7 6...0	9
Albuca , decorative greenhouse Cape bulbs, which may also be planted out under a south wall.		
<i>canaliculata</i> , producing handsome trusses of very fragrant <i>golden-yellow</i> flowers, 1½ ft.	— ...2	6
<i>fastigiata</i> , produces handsome trusses of <i>white</i> and <i>green</i> flowers, 1½ ft.	4 6...0	5
<i>Nelsoni</i> , a lovely species, bearing in June noble spikes of almond-scented flowers, <i>pure white</i> with slight <i>brown</i> stripe, 3 ft.	7 6...0	8
Alocasia <i>odora</i> , a grand foliage plant for greenhouse decoration or sub-tropical work in summer, 3 ft.	— ...2	6
Alströmeria . These beautiful 'Peruvian Lilies' are very easy to cultivate, and produce in Summer abundance of charming flowers valued for cutting, as they last long in water. Their showy and attractive colours render them most valuable border plants. Plant so that the top is four inches below the surface, selecting by preference a situation close to a wall or hedge, and protecting, the first winter, with leaves or litter. <i>A. pelegrina</i> varieties and <i>A. pulchra</i> are more tender, and delight in hot, dry, sunny situations, such as under a south wall; they are also fine plants for a cool greenhouse.		
<i>aurantiaca</i> , flowers <i>rich orange</i> , spotted <i>carmine</i> , very showy, 3 ft.per 100, 12s. 6d.	1 9...0	2
<i>chilensis hybrida</i> , mixed, beautiful shades of <i>rose</i> , <i>crimson</i> , <i>orange</i> , <i>yellow</i> , <i>buff</i> , and <i>blush</i> , with <i>yellow</i> and <i>crimson</i> markings, valuable as cut flowersper 100, 12s. 6d.	1 9...0	2
<i>lutea</i> , bright <i>yellow</i> flowers with <i>carmine</i> spotting, very pretty, 3 ft., 10s. 6d.	1 6...0	2
<i>pelegrina alba</i> , <i>white</i> , very chaste and beautiful flowers } Grow under a south wall or in {	5 6...0	6
" <i>rosea</i> , <i>rose-coloured</i> flowers, beautifully spotted } frames. }	4 6...0	5
<i>psittacina</i> (The Parrot Flower), bright <i>crimson</i> flowers splashed <i>green</i> and <i>mahogany</i> , 3 ft.per 100, 12s. 6d.	1 9...0	2
<i>pulchra</i> (tricolor), <i>white</i> and <i>yellow</i> flowers, striped and blotched <i>crimson</i>	3 6...0	4

Amaryllis, Barr's Choice Unnamed Hybrids, Flowering Bulbs, for pot-culture in greenhouse; purchasers are sure to be satisfied with the flowers, and have a good chance of getting new varieties of exceptional beauty 21 0...2 0

Amaryllis

<i>belladonna</i> (The Belladonna Lily), bearing umbels of beautiful large <i>white</i> flowers flushed and tipped <i>soft rose</i> . If planted in light soil against a south wall it will establish itself and bloom freely every year	6 6...0	8
<i>formosissima</i> (The Jacobea Lily), dark <i>crimson</i>	4 0...0	5
" <i>glaucia</i> , <i>crimson-scarlet</i>	4 0...0	5

These *Jacobea* Lilies have large quaintly shaped handsome flowers; they may be planted outdoors in a hot sunny situation in April, or be potted up earlier.

Amianthium muscætoxicum (Fly Poison), an interesting North American Liliaceous plant, bearing in May a dense raceme of *cramy white* flowers, 1½ ft.; it likes a moist soil and slight protection in winter 8 6...0 | 9 |

AMARYLLIS FORMOSISSIMA
(JACOBÆA LILY).

- Amorphophallus**, curious and ornamental bulbous plants from the tropics, interesting as pot plants and valuable for sub-tropical bedding. The tubers should be kept dry and away from frost during winter, and planted outdoors March to April, 4 inches deep, or, if for indoor decoration, be potted earlier.
- campanulatus**, a very curious species, flowers very large, dark red and black, and produced close to the ground..... — ...1 6
- Rivieri (Umbrella Arum)**, a very handsome plant, with large palm-like leaves 2 to 3 ft. in diameter, on a white-spotted stem; a charming pot plant for a room.....strong tubers 10 6...1 0

Anemone or Windflower.

For brilliancy of colour few flowers can compare with the **Anemone**, which in spring produces its masses of bloom in endless variety of shades, scarlets, crimsons, roses, blushes, lilacs, blues, purples, and white, all of which for cutting are valuable, lasting long in water. For beds, edgings, and masses in the borders it is matchless, and may be had in bloom, weather permitting, from November to July, according to situation, locality, and time of planting.

CULTURE.—Any good, richly manured soil suits the **Anemone**. Plant in succession from October to May, the roots four to six inches apart, at a depth of two to three inches, choosing a dry day, and when the ground is in good working condition. In cold, bleak, or low-lying districts it is advisable to cover the beds lightly after planting with long litter or ent evergreen branches until the plants are well in leaf, and danger from severe frosts is past. In April and May, during dry weather, water the beds freely, two or three times a week if necessary, and when the flower buds appear water daily if required. *The Spring plantings are best made in semi-shady situations. The roots should be steeped in water, for 6 hours, before planting.*

BARR'S DOUBLE POPPY ANEMONES. The flowers resemble semi-double Hollyhocks, and are very handsome. Planted from January to April, they flower in succession from April to July.

Collection—100 in 25 beautiful varieties, 7s. 6d. p. 100 p. doz.
—50 in 25 4s. s. d. s. d.

Anemone Fulgens.

Anemone fulgens, with its rich dazzling scarlet flowers, and light elegant growth, is the most brilliant and graceful of all Winter and Spring-flowering Anemones. It is invaluable for table bouquets or vases, as it lasts a long time in water. This brilliant flower should be used largely in wild gardens, orchards, woodlands, on half-shady banks, &c. *Steep the roots 6 hours in water before planting.*

GALTONIA CANDICANS.

Galtonia candicans (*syn. Hyacinthus candicans*). The Great Snow-white Summer-flowering Hyacinth. A very handsome bulbous plant, attaining a height of 3 to 6 ft., according to soil and situation, and surmounted with 20 to 50 graceful pendant pure white bell-shaped flowers; very decorative when grouped in the flower border or on lawns, associated with the scarlet *Gladiolus Brenchleyensis*; it makes also a fine pot plant for the conservatory.

Strong Flowering bulbs, 100, 7s. 6d.; doz. 1s. 3d. —

Gelasine azurea, a beautiful South American bulbous plant, bearing in early summer umbels of deep blue flowers, hardy if slightly protected, 1 ft.

3 6

Gesneras, a very beautiful family of greenhouse plants requiring similar treatment to the *Achimenes*; their handsome velvety foliage and elegant spikes of brilliantly coloured flowers render them objects of great beauty.

BARR'S BEAUTIFUL LARGE-FLOWERED GLADIOLI.

GLADIOLI rank amongst our most decorative and handsome of late summer and autumn flowers, and should be given a place in every garden. Their grand spikes of bloom are greatly valued for vases, lasting as they do a long time in water, and mixing well with the choicest of flowers.

A GROUP OF BARR'S GLADIOLUS GANDAVENSIS.

enter the pots, and when the flower spikes are somewhat advanced remove to the greenhouse. When in full growth give abundance of water during dry weather, and, when blooms are showing, a little manure water.

A FEW NOTES ON GLADIOLUS CULTURE, &c.

TIME OF PLANTING.—This is dependent greatly on season and locality. As a rule, planting may commence end of March, and be continued to early in June.

SOIL AND SITUATION.—The Gladiolus loves a deep, rich, well-drained soil, and a sunny situation. The ground should be prepared some time previous to planting by deeply trenching, and mixing in an abundance of old decayed manure. Plant four inches deep, and surround the bulb with mixed sand and charcoal or wood ashes. This little extra trouble is well repaid by a strong healthy growth. The bulbs should be planted nine inches apart.

AFTER-MANAGEMENT.—As soon as the plants are sufficiently advanced to require support, each should have a stout stake, and at this period a top dressing of partly decayed manure should be given to aid growth, and to prevent undue evaporation of moisture from the soil. *During dry weather give liberal waterings.*

PLANTING TO ADVANTAGE.—Gladioli are most effective when planted in clumps of three to twelve; for a bold handsome effect plant in groups of fifty, a hundred, or more. In Rhododendron beds and amongst shrubs they are exceedingly effective, especially when associated with Lilies, Cannas, Tritomas, Hyacinthus candicans, Plantain Lilies, &c.

CULTURE IN POTS.—Potting may be done from February, one bulb in a 6-inch pot, or three bulbs in an 8-inch pot, using a mixture of good rich soil; care should be taken that the drainage is perfect. Plunge the pots in ashes in a cold, airy frame, or a sheltered corner of the garden, on a hard surface so that no earthworms can

NEW HYBRID BUTTERFLY GLADIOLI.

Lemoine's beautiful Hybrids of *G. purpureo-auratus* and the best of the *G. Gandavensis* varieties.

A handsome race of Gladioli, distinct in form and markings from the varieties of *Gandavensis*; the colours are beautiful, and the large blotches on the lower petals strikingly attractive. They are hardy vigorous growers, and bloom during the interval between the early and late-flowering Gladioli. *The Varieties offered below are some of the finest.*

BEAUTIFUL LILIES FOR SPRING PLANTING.

FOR BEDS AND BORDERS, ALSO FOR GREENHOUSE DECORATION.

THE LILY, for variety of colour, chasteness, and beauty of form, is matchless amongst hardy plants. The flowering commences in May, and a continuous unbroken succession of bloom, from species of different countries, is maintained till the frosts of autumn destroy the last unexpanded flower buds.

CULTURE OUT-OF-DOORS.—In choosing a situation for planting, *perfect drainage*, natural or artificial, should be the first consideration. The borders of Rhododendron and Azalea beds, and such like positions, are generally suitable for Lily culture, as the necessary compost for the particular species can easily be given, and the shelter from the surrounding branches is beneficial in protecting the plants from cold winds in spring, and also affording a partial shelter from the sun's rays in summer. Sheltered spots in mixed herbaceous and shrubby borders will also do. In preparing the ground, loosen the soil to a depth of several feet, and add fresh loam, coarse sand, and *sweet* decomposed leaf soil, or good peat, care being taken that the *soils are as free as possible from insect life*, and the compost sufficiently friable. Plant the bulbs 4 to 6 inches deep (except where otherwise stated), and they may then remain undisturbed for many years. The bog or swamp-loving Lilies **Superbum**, and the varieties of **Canadense** and **Pardalinum**, prefer a rather moist peaty or retentive loamy soil and rather shady situation; they are admirably adapted for growing amongst Rhododendrons and Azaleas, and for the sides of brooks, ponds, rivulets, &c.; they are also charming naturalized in Grass.

CULTURE IN-DOORS.—**THE LILY** being a free rooter requires plenty of pot room, therefore use in most cases a 6 or 8-inch pot for one bulb, according to its size, and a compost of fibrous loam and sweet decomposed leaf soil, with plenty of coarse sand or good peat; or loam and sand will do. *See that the drainage is perfect and the inside of the pot clean, to start with.* Pot firmly, barely covering the top of the bulb, and leaving room to add more soil when the surface roots appear. Select a situation out-of-doors, protected from the afternoon sun, and stand the pots on a bed of ashes raised above the general level to avoid stagnant moisture, and made firm to prevent the entrance of worms; then cover with six inches of cocoa-nut fibre or old leaf soil to keep off excessive rains. When top growth begins to show above the covering, remove the pots to a cold frame, pit, or greenhouse, and start giving water sparingly; a little *clear weak liquid manure given twice a week*, when the flower buds are well advanced, will greatly assist in the development of fine blooms. A north wall or hedge is a suitable situation for starting the bulbs. If very early flowers are required the Lily may be started in a *gentle* heat as soon as potted, but as soon as top growth shows itself the plant must be kept as near the glass as possible to prevent being drawn. **Superbum** and the varieties of **Canadense** and **Pardalinum** prefer for soil a moist sandy peat, but will also thrive in any good fairly moist soil.

☞ To those desiring further information regarding Lilies, we recommend Dr. Wallace's 'Notes on Lilies,' price 5s.

BEAUTIFUL LILIES FOR SPRING PLANTING—*continued.*

Auratum (the White Golden-rayed **Crimson-spotted Hill Lily of Japan**), this is, indeed, the **Queen of Lilies**, and should have a place in every garden and greenhouse. It is of simplest culture and perfectly hardy. Those who have beds of *Rhododendrons* should plant this grand Lily freely amongst them for a succession of flowers. Growing amongst *Peonies*, and along the margins of evergreens, clumps of *L. auratum* (six to twelve bulbs in a clump, planted three to six inches apart), produce a grand effect. As isolated subjects on large lawns, groups of *Lilium auratum* look very handsome and stately. A situation should be chosen where the plants are sheltered from cutting winds and screened from the mid-day sun.

LILIUM AURATUM.

Splendid Large Bulbs, producing an abundance of flowers, 12 for 10s. 6d., 25 for 20s., 50 for 38s., 100 for 70s.

Good-sized Bulbs, producing numerous flowers, 12 for 7s. 6d., 25 for 14s., 50 for 26s., 100 for 50s.

Smaller Bulbs, but of good flowering size, 12 for 5s. 6d., 25 for 10s., 50 for 19s., 100 for 36s.

A few Special Monster Bulbs, 1s. 6d. & 2s. each.

	each	s. d.
Auratum var. Alexandræ , a very distinct and beautiful new white Lily from Uke Island, discovered 1893.....	7	6
„ Beauty of Japan (new) , a splendid new variety of <i>L. auratum platyphyllum</i> type, its grand large flowers being very broadly banded with glowing dark crimson down centre of petals; it is a stately Lily of great beauty and a fine acquisition.....	15	0
„ pictum , large white flowers beautifully spotted crimson, and petals tipped red, very showy, per doz. 25s.	2	6
„ platyphyllum , very large handsome flowers of great substance, with broad white petals, spotted crimson, 7 to 10 ft.,		

Extra strong bulbs, per doz. 25s. 2 6

Auratum rubro-vittatum, large pure white flowers, with a broad deep crimson band down the centre of each petal. A Lily of great beauty and the admiration of all who see it.

„ **virginale**, beautiful large white flowers with golden band down each petal, chaste and beautiful, height 6 ft. **Extra strong bulbs**, per doz. 25s. 2 6

Batemanni, a beautiful Lily with rich glowing orange-red flowers, in August and September, height 3 ft. **Extra strong bulbs**, per dozen 7s. 6d. 0 8

Bolanderi, a beautiful new Lily from Oregon, with dense whorls of foliage and elegant bell-shaped flowers, deep crimson, spotted maroon, 1½ ft. **First-Class Certificate**..... 3 6

Brownii, a grand and beautiful Lily, producing, in July, handsome trumpet-shaped flowers nearly 10 inches long, tips of petals reflexing slightly, pure white inside, with brown anthers, outside a chocolate-brown colour, 3 ft.; a splendid Lily for borders or pots, and of easy culture, per dozen 10s. 6d. 1 0

„ **Extra strong bulbs**, „ 15s. 1 6

Canadense flavum, flowers soft yellow, heavily spotted crimson, 3 ft. „ 10s. 6d. 1 0

„ **rubrum**, flowers red, inside orange spotted black, 3 ft. „ 10s. 6d. 1 0

„ **mixed**, flowers variously spotted, 3 ft. „ 7s. 6d. 0 8

Catesbæi, a beautiful species, bearing in Autumn large erect flowers, orange-scarlet, spotted dark crimson, 1½ ft. 1 6

Chalcedonicum (The Scarlet Turk's Cap Lily of cottage gardens), flowers intense deep scarlet, blooming in July, very showy and effective, 3 ft. **Extra large bulbs** 1 0

„ **Concolor**, a small graceful Chinese Lily, bearing fiery scarlet flowers, 1 ft. **First-Class Certificate R.H.S.** 1 0

„ **coridion**, rich golden-yellow flowers, blotched purple; an elegant Lily, 1 ft. 1 0

Davuricum (*syn. Umbellatum*), a showy section of June-flowering Lilies, very effective planted in clumps in shrubbery and flower borders, also good pot plants. This Lily is generally sold under the name of *Lilium umbellatum*.

„ **erectum**, rich cerise-scarlet, shading to yellow, 2½ ft. per doz. 3s. 6d. 0 4

„ **Incomparable**, intense rich crimson, freely spotted, a handsome showy variety, 2 ft. per doz. 4s. 6d. 0 5

„ **Sappho**, scarlet, shading to orange, moderately spotted, 2 ft. „ 4s. 6d. 0 5

„ **fine mixed varieties**, 2 ft. to 3 ft. per 100, 17s. 6d.; „ 2s. 6d. —

Elegans. See *Thunbergianum*.

Giganteum, the most majestic of Lilies, with large handsome heart-shaped leaves, and very long white trumpet-shaped flowers, 6 to 10 ft. grand bulbs, each 5s. 6d., 7s. 6d., 10s. 6d. & 15 0

Grayi, a strikingly handsome Lily from the Alleghany Mountains, flowers of distinct and elegant form, rich deep blood-crimson, interior spotted maroon-black and shading to golden yellow, habit light and graceful, 2 ft. 2 6

Hansonii (The Japanese Yellow Martagon Lily), large thick wax-like flowers, bright golden-yellow, spotted crimson-maroon; one of the most beautiful and distinct of June-flowering Lilies, 3 ft. Robust and of easy cultivation; **First-Class Certificate**..... 2 6

BEAUTIFUL LILIES FOR SPRING PLANTING—continued.

	each—	s. d.
Henryi , a most handsome and elegant Lily discovered lately by Dr. Henry in North China; the flowers resemble in form <i>L. speciosum</i> , but are <i>orange-yellow</i> in colour, and freely produced in branching heads; a hardy and vigorous grower, ht. 5 to 6 ft.	A few extra large bulbs	5 6
Humboldtii , large handsome flowers, rich <i>golden-yellow</i> , spotted <i>dark crimson</i> , of great substance, with recurved petals, very showy, 5 ft.		2 6
magnificum , a splendid new variety, bearing large handsome flowers, deeper in colour than <i>L. Humboldtii</i> , and more heavily spotted; the recurved petals are conspicuously stained at the tip, <i>purplish brown</i> , 5 ft. <i>First-Class Certificate R.H.S.</i>		5 6
Japonicum Colchesteri (syn. <i>Odorum</i> and <i>Japonicum</i>), a rare Lily, bearing in July handsome flowers resembling those of <i>Lilium Brownei</i> , but the interior of the flower is of a <i>chrome-yellow</i> changing to <i>creamy white</i> , while the outside is a very <i>dark chocolate-brown</i> colour; very fragrant, 3 ft. <i>First-Class Certificate R.H.S.</i>		5 6
Krameri , delicate <i>rose-pink</i> , a chaste and beautiful flower, of elegant outline and graceful habit of growth, July flowering, 2 ft.	Extra strong bulbs, per doz. 10s. 6d. & 15s. & 15s. &	1 6
Leichtlini , numerous handsome <i>golden-yellow</i> flowers, spotted <i>crimson-purple</i> , 3 to 4 ft. ...doz. 21s.		2 0
Longiflorum , a beautiful section of Lilies, with long <i>snow-white</i> trumpet-shaped flowers, in <i>June</i> and <i>July</i> . Greatly prized for pot-culture, and for flower-beds and borders.		
albo-marginatum , very ornamental, with handsome <i>silver-striped</i> foliage and large <i>pure white</i> trumpet-shaped flowers, 2 ft.		1 6
Harrisii (The Bermuda or Easter Lily), a graceful Lily, with long handsome <i>snow-white</i> flowers, greatly in demand for early forcing, 3 ft.per doz. 7s. 6d.		0 9
" " " Extra strong bulbs , " 10s. 6d.		1 0
robustum , also known as <i>Japonicum giganteum</i> , a strong robust-growing Japanese variety, bearing large handsome <i>snowy white</i> trumpet-shaped flowers, which are not inclined to split when the bulbs are forced; valuable for succeeding <i>L. Harrisii</i> , as it blooms later, 3 ft.	Strong bulbs, per 100, 30s.; per doz. 4s. 6d.	0 5
" " " Extra strong bulbs , " 6s. 6d.		0 7
Takesimæ (Jama-Jura Lily of the Japanese), a handsome variety, with large long trumpet-shaped <i>white</i> flowers, slightly tinged on outside, 2 ft.doz. 4s. 6d.		0 5
LILIIUM LONGIFLORUM ROBUSTUM.		
Maritimum , a beautiful distinct species, recently introduced, flowers bell-shaped, <i>blood-crimson</i> , spotted <i>maroon</i> , 2½ ft. <i>First-Class Certificate</i>		2 6
Martagon , a tall and stately Lily, bearing in July pyramidal heads of <i>purple</i> reflexed flowers, spotted more or less with <i>black</i> , 4 ft.per doz. 4s. 6d.		0 5
album , one of the most beautiful of Lilies, bearing in summer handsome heads of <i>pure white</i> reflexed flowers, 4 ft. <i>First-Class Certificate</i>		3 6
dalmaticum , a stately Lily with long spikes of rich glossy <i>dark crimson-purple</i> (almost <i>black</i>) reflexed flowers, a most beautiful Lily, 4 ft.		2 6
Monadelphum szovitzianum (Colchicum), bearing handsome spikes of numerous large flowers of great beauty, clear <i>citron-yellow</i> , spotted <i>black</i> , turban-shaped, 3 ft.per doz. 18s.		1 9
Nepalense , a magnificent greenhouse Lily of striking beauty, bearing large trumpet-shaped flowers, <i>golden-yellow</i> , heavily blotched inside with <i>crimson-purple</i> , 3 ft.	3s. 6d. &	4 6
Pardalinum , stately, elegant growing, shade-loving Lilies, with large, handsome, showy flowers. They are charming when naturalised in grass, and make grand border plants.		
type , bright <i>scarlet</i> , shading to rich <i>yellow</i> , freely spotted <i>purple-brown</i> , flowers large, numerous and very handsome, 5 to 6 ft.per doz. 4s. 6d.		0 5
Bourgæi , bright <i>crimson</i> , shading to <i>yellow</i> , spotted <i>maroon</i> , with narrow foliage, in regular whorls, flowers abundant, large and beautiful, 6 ft.per doz. 7s. 6d.		0 8
californicum , flowers intense <i>crimson</i> , shading to <i>orange</i> , and spotted, large and very showy; of more slender growth than the other varieties, 3 to 4 ft. ...per doz. 10s. 6d.		1 0
Johnsoni (new), one of the best of the <i>Pardalinums</i> , from British Columbia, of strong sturdy growth, with dark green foliage and very showy flowers, <i>glowing crimson</i> , shading to <i>orange</i> , 5 ft.	2s. 6d. &	3 6
Michauxi , <i>crimson-scarlet</i> , shading to <i>yellow</i> , spotted <i>maroon</i> ; later blooming than the other varieties, 4 to 5 ft.per doz. 5s. 6d.		0 6
parviflorum , a distinct and beautiful little Lily, bearing a profusion of small elegant flowers, <i>yellow</i> , spotted <i>brown</i> , 3½ ft.per doz. 18s.		1 9
mixed varieties for naturalising in quantity in damp peaty places, 100, 32s.; per doz. 4s. 6d.		—
Parryi , a very beautiful Californian species with large <i>bright yellow</i> flowers, lightly spotted and of delicate perfume, 3 ft. <i>First-Class Certificate R.H.S.</i>		3 6
Parvum , very distinct and showy flowers, small and bell-shaped, bright <i>orange</i> , freely spotted, 3½ ft.; it delights in a moist and peaty soilper doz. 10s. 6d.		1 0
Philadelphicum , a graceful little Lily, with charming flowers, <i>scarlet</i> , shading to <i>orange</i> , elegantly spotted <i>black</i> , 1 ft.per doz. 10s. 6d.		1 0
Pomponium , true, a beautiful early-flowering Lily, with very graceful foliage, flowers reflexed and of a rich <i>sealing-wax scarlet</i> colour, 2 to 3 ft.per doz. 7s. 6d.		0 8

LILIIUM LONGIFLORUM ROBUSTUM.

Lily of the Valley. For Forcing and making Plantations out-of-doors.

The **Berlin Crowns** are extensively used for forcing by the growers for Covent Garden Market; of these, 15 to 20 may be planted in a 5-inch pot. For **Lily of the Valley beds**, also for massing in north borders, and to naturalise in woods, copses, &c., we recommend **Fortin's Giant flowered**, the "**Alexandra**" strain, and the **Dutch**.

CULTURE INDOORS.—A moist atmosphere, with a temperature of 80 to 85 degrees, and abundance of water is necessary to success in forcing **Lily of the Valley**; to encourage simultaneously the development of flower and foliage, place the pots in a shady damp part of the house, or invert a flower-pot over the crowns, till the flower and the foliage have made some progress, when remove to a less shady situation. If they are grown in a dry atmosphere, or get an insufficient supply of water at the roots, the crowns, technically speaking, go "blind."

Barr's Finest Selected Berlin Crowns, for general forcing in pots or boxes, &c. p. doz. each
s. d. s. d.
per 1000, 60s.; per 100, 6s. 6d.

Barr's Strong Selected Clumps for pot culture 10 6...1 0

Fortin's Giant-flowered Strain (see *Illustration in our General Bulb Catalogue*), a very beautiful strain, with remarkably large handsome bells on long sturdy stalks; a giant compared with the ordinary variety; we specially recommend it for out-door culture. Plant the crowns 9 inches apart, and when established its grand flower spikes will surprise the grower. *The flowering crowns offered may be very slowly forced in March,*

Flowering Crowns, per 100 15s.

Planting Crowns (specially recommended) " 8s. 6d.

Barr's Improved English Strain "Alexandra," bearing sturdy spikes well clothed with large handsome bells; specially suited for out-door culture, but may also be *very slowly* forced in March per 100, 8s. 6d.; 1 3... —

Good Selected Flowering Dutch Crowns, for out-door planting, in beds, &c., and naturalising in woodlands per 1000, 42s.; per 100, 5s.

Littonia modesta, an elegant greenhouse climber, bearing in July and August numerous elegant *golden-yellow* bell-shaped flowers. Pot up for the greenhouse, or plant outdoors in April in a warm situation and light soil — ...1 3

Malvastrum

Gilliesii (*Modiola*), a charming dwarf hardy rock-plant profusely covered with *crimson-purple* flowers all the summer 5 6...0 6

Medeola asparagoides (*Smilax*), an elegant little greenhouse climber for hanging baskets, &c.; its flowers are scented like those of orange blossoms, while the foliage is much in demand for table decoration 4 6...0 6

Mirabilis Jalapa (*The Marvel of*

Peru), a fine border plant, forming handsome and compact bushes covered in summer with a profusion of bright attractive flowers; it delights in sunny situations, and should be freely used in large beds and borders. *The Culture is the same as for Dahlias.*

In separate colours 7 6 —

Mixed colours 5 6 —

Montbretia.

The **Montbretias** rank amongst our most decorative hardy summer-flowering bulbous plants. They have an elegant growth, and produce freely in early August graceful spikes of *gorgeously* coloured flowers, which are of the greatest value for cutting, lasting long in water, and mixing well with all kinds of foliage. They grow freely in any flower border enriched with manure, but a sunny situation is preferable. As pot plants they are remarkably graceful and decorative.

Pottsii, graceful branched spikes of medium-sized brilliant *vermilion-scarlet* flowers, remarkably showy, 2 ft. Figured in *The Garden* per 1000, 25s.; per 100, 3s. 0 6... —

" **superba**, brilliant glowing *vermilion*, inside a *rich golden*, 1½ ft. per 100, 10s. 6d. 1 6...0 2

crocosemaeflora, elegant branched spikes of large handsome showy flowers, brilliant *orange-red* shaded *golden*, a grand flower for cutting, 2½ ft. per 1000, 35s.; per 100, 4s. 6d. 0 8... —

" **aurea**, large *golden-yellow* flowers, beautiful, 2 ft. per 100, 10s. 6d. 1 6...0 2

MONTBRETIA CROCOSMEÆFLORA

Tigridia pavonia (Tiger-spotted Flower).

TIGRIDIA GRANDIFLORA RUBRA.

No flower is more gorgeously coloured or more beautiful. The bulbs can be planted out-doors March, April, or May in a sunny situation; but for indoor decoration put up as soon as bulbs are received and plunge in a cold frame, withholding water till the foliage appears, and then giving sparingly at first. Those bulbs intended for out-doors should be stored in dry soil or sand, away from frost till time for planting. (*Beautiful Coloured Plate of T. alba*, price 6d.)

Collection—12 bulbs of each of the following 5 varieties of			
Tigridia , 7s. ; 6 bulbs each, 3s. 9d.	p. 100	p. doz.	
<i>conchiflora</i> , petals yellow, cup yellow, spotted scarlet, s. d. s. d.			
large flower	10	6...	6
<i>grandiflora rubra</i> , petals rich scarlet, cup spotted crimson on a yellow ground, flowers very large, 1 ft	10	6...	6
.. <i>alba</i> , petals white, cup spotted ruby, large, very chaste and beautiful, 1 ft.	10	6...	6
.. <i>immaculata</i> , flowers pure white throughout, beautiful, 1 ft.	12	6...	9
.. <i>Ruby Queen</i> , beautiful soft ruby-rose, large handsome flower, 1 ft.	12	6...	4

Tigridia Van Houttei, small flowers 2 in. across, chocolate-brown, reticulated yellow, a very curious, distinct, and beautiful little species, 1 ft. each 1 0

Tropæolum tuberosum, a very showy twiner, growing 3 to 4 ft. high, and producing in autumn a profusion of red and yellow flowers; a pretty subject for trailing over trellises, old tree-stumps, &c.; plant out in March and April, selecting an open sunny situation and a light sandy soil; until planting time store the tubers in sand away from frost...per doz. 3s. 6d. 0 4

Tuberose. This valuable sweet-scented flower is too well known to need description. For early flowering pot the bulbs as soon as received, and plunge the pots in a temperature of 60 to 70 degrees. The bulbs for succession keep dry, or pot at once to make root growth; in either case the temperature should not be below 50 degrees or the bulbs will suffer. For outdoor decoration start the bulbs in a cold frame or in gentle heat, and plant out end of May.

Double American Dwarf, "Excelsior Pearl"; comparatively dwarf, with pure white double flowers.....strong forcing roots, specially selected, per 100, 15s.; per dozen 2s. 6d. 0 3
 .. **Extra Early African**, flowers pure white very double, and flowering a little earlier than the *American Pearl Tuberose*; large bulbs, per 100, 15s.; per dozen 2s. 6d.; **Monster bulbs**, per dozen 3s. 6d. 0 4

Vallota purpurea (The Scarborough Lily), a most valuable Autumn-flowering plant, its handsome trusses of brilliant scarlet flowers being greatly valued for vases. We recommend it to be planted out of doors in May, and when in bud potted up for conservatory decoration. Established in pots, per doz. 15s. & 21s.; each 1s. 6d. & 2 0

Watsonia

coccinea, a very beautiful bulbous plant, bearing in summer handsome spikes of gorgeous vermilion-scarlet flowers on a reddish-brown stem; treat the same as Autumn-flowering *Gladioli*, ht. 1½ ft.per doz. 2s. 6d. 0 3

Zephyranthes (*syn. Amaryllis*). These Swamp Lilies are a beautiful family of bulbous plants, requiring greenhouse culture, or they may be grown in a sunny well-drained situation against a south wall. Charming pot plants, several bulbs in a pot. Early summer flowering, except *candida*, which produces its charming white flowers in autumn. p. doz. each s. d. s. d.

atamasco, large pure white flowers, nearly 3 in. long, ½ ft. 7 6...0 9

candida (The Flower of the West Wind), producing a profusion of white crocus-like flowers in autumn, valuable for edgings, masses, &c.per 100, 7s. 6d. 1 3 —

carinata, beautiful delicate rose colour, large handsome flowers, 1 ft.per 100, 42s. 6 0...0 7

Treatise, beautiful white fragrant Lily-like flowers, 1 ft. 12 0...1 3

"PHYTOBROMA,"

BARR'S NEW PLANT FOOD.

The best Manure for Flowers, Vegetables, Fruit, Cereal and Root Crops, and for Lawns.

PHYTOBROMA we can confidently recommend to our Customers as a valuable food for all kinds of plants, being rich in those chemical properties essential to the health and productiveness of vegetable life. It contains a large percentage of phosphates and potash salts in a form acting directly on the roots of a plant. It is cleanly to handle and without offensive odour.

PHYTOBROMA secures to Vegetable, Fruit, Cereal, and Field Root Crops a strong healthy growth, and consequently an increased and superior crop. In the culture of Flowering Plants its use produces a greater profusion of bloom, increased size of flower, and richness of colour.

Exhibitors at Flower Shows will find this a valuable Manure.

For the improvement of Grass Lawns, Tennis Courts, Cricket Grounds, **PHYTOBROMA** can be strongly recommended, its use soon producing a thicker growth and richer colour.

Full particulars, with directions for use, on application.

2-lb. tin, 1/-; 7-lb., 2/6; 14-lb., 4/6; 28-lb., 7/6; 56-lb., 12/6; 1 cwt., 20/-

Prepaid Orders for 28 lbs. and upwards sent Carriage Paid to any station in Great Britain and to any port on the Irish coast.

Special quotations for larger quantities on application.
